

Datasheet

SSP Range - Angled Stainless Steel Posts

Product Description

The RPSS range are stainless steel posts with an angled top for mounting readers, keypads, or intercom units.

Balancing aesthetics and practicality, this post is the perfect complement to a wide range of projects in any non-coastal environments.

Manufactured in the UK from high-grade stainless steel, the RPSS can be customised and sprayed in any RAL colour to suit the needs of your project.

The RPSS-CUT includes a cut-out for a standard UK back-box, making installation of electronic components easier. The cut-out also enables flush mounted devices to be installed.

Key Features

- Square or round mounting post with angled top
- 304 high grade stainless steel
- Grained finish
- Base plate cover available
- Pre cut-outs available
- Suitable for outdoor installation (non-coastal environments only)

 Certification
