

ALPRO AL110 Series 12V/24V DC Mortice Release

Description

The AL110 electric strike series is an ANSI style security strike complete with stainless steel short or long faceplates for use in metal or timber door applications. The electric door strike is designed with a moveable stainless steel jaw, which when an electrical current is applied either opens or remains in the locked position. In this way the traffic using the door can be rigorously controlled.
