

Description

The Fireco Dorgard enables you to legally and safely hold fire doors open, by allowing the door to close when the fire alarm sounds preventing the spread of fire and smoke. This model features New SmartSound technology, meaning the Dorgard is continuously listening for a fire alarm sound, but is not triggered by vacuum cleaners and other common background noises. The Dorgard is easy to install on the bottom of a door in under five minutes using just four screws. As the unit is battery powered there is no wiring required. The unit also features automatic night-time release and adjustable sensitivity. This unit improves access throughout buildings in line with the Equality Act (2010). It is suitable for fitting onto any door and it is carpet friendly, leaving no marks.
