

Datasheet

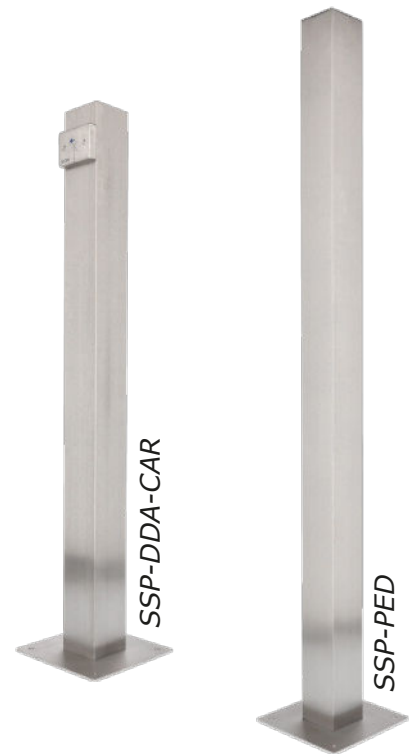

SSP Range - Square Stainless Steel Posts

Product Description

The SSP range are stainless steel posts meeting wheelchair, car and pedestrian specifications at standard heights of 1.2m and 1.6m respectively.

Ideal for mounting keypads, readers, or intercoms, these posts balance aesthetics and practicality. The SSP range is the perfect complement to a wide range of projects in any non-coastal environment. They are the ideal addition to access control systems for car parks, residential complexes, office buildings, and more.

Manufactured in the UK from high grade stainless steel, the SSP can be customised and sprayed in any RAL colour to suit the needs of your project.
