

Description

The dormakaba (formerly known as Dorma) PHA antithrust latch panic device is to suit door widths up to 1000mm. The antithrust latch prevents the latch from being pushed back by unauthorised means when it is in the closed position.

This unit carries the CE mark and has been tested and certified compliant in accordance with EN 1125 standards, meaning it is suitable for use in public buildings where prior knowledge of how to open the escape door is not expected.

Complies to BS EN 1125

Reversible Handling

Features

- Central anti-thrust panic latch
- Silver finish
- For fire and smoke check doors
- Dogging device holds the latches in retracted position so the door is freely accessible
- Non-handed design
