

CODELOCKS CL410 Digital Lock With Tubular Mortise Latch CL410

Description

The CL410 is part of the Codelocks CL400 series, and is a medium duty mechanical tubular mortise latch with lever handles. The outside lever handle will retract the latch after a correct code is entered and the spring loaded latchbolt will lock automatically when the door is closed. Featuring a protective clutched handle mechanism and a weather resistant PVD finish, this is a reliable non-handed unit which is suitable for both indoor and outdoor use.

Clean by Codelocks is an optional finish available to special order on many Codelock products. The clear coating combats SARS-CoV-2 coronavirus (COVID-19) and can reduce bacterial growth by 99.96%*, providing an additional measure of protection over sanitisation. Clean by Codelocks features an ISO certified photocatalytic coating which offers enhanced protection against viruses, bacteria, germs and other environmental toxins. For full details please view the data sheet in the associated documents or to order please contact our Specials Department.
